Art Unit: 3751

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-15, drawn to a seat and light, classified in class 4, subclass 237.

II. Claims 16-30, drawn to a light, classified in class 362, subclass 155.

The inventions are distinct, each from the other because:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the particular structure recited in claim 16 is not relied upon for patentability in claim 1. The subcombination has separate utility such as a container lid.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification which would lead to divergent fields of search, restriction for examination purposes as indicated is proper.
